## SPECIFICATION

Part Number:
Product Name:

Features:

RG.02.01.3000W
Road Marker Kit - Quad Band Cellular Antenna RG. 01 with CAB. 826 Cable Assembly

## AMPS/GSM/PCS/DCS

850/900/1800/1900
Low Profile - Diameter 101.4 mm*Height 17.6 mm
UV and Vandal resistant ABS housing
RG.01: 1.5M WY-100 cable SMB(M) Jack
CAB.826: 1.5M WY-100 SMB(F) to SMA(M)ST

## RoHS Compliant

## 1. Introduction

Taoglas USA has designed a range of efficient antennas inside US standard raised non-reflective road markers. These are designed for, and installed inside, the low profile "Bott's dots" that can be mounted directly on the pavement and road in the USA.

These antennas exhibit remarkably high efficiencies in such small packages and live in a very low profile enclosure. They are designed to be mounted directly on the road or pavement, just like a standard road marker.

These antennas have been potted with the epoxy that is traditionally used to secure the road marker itself to the ground. There are no air gaps whatsoever inside the new type approved road marker with antenna, in order to maintain the mechanical integrity. It is presumed that the standard black epoxy will also be used to install the road marker in its final resting place on the ground.

The CAB. 826 cable assembly is included so the antenna cable can be easily disconnected if desired.
